

BRAKE OPTIONS

Cruisemaster A/T Electric Brakes

Cruisemaster All-Terrain Brakes provide a cost effective, quality 10" and 12" braking product for the Australian Market.

Features of Cruisemaster All-Terrain Electric Brakes

- Extended brake lines with quick connects
- All-Terrain spec. magnet
- Suitable for use with Electronic Stability Control Systems
- "ABS Compatible" backing plate (requires additional hardware for use with ABS Systems)

Cruisemaster ABS Enables A/T Electric Brakes

Includes "ABS Enabling" components such as Wheel Speed Sensor, Positioner, Tone Ring and Flylead ready to connect to an ABS/ESC system such as Bosch TSC.

Towing Benefits of ABS Systems (Anti-Lock Braking System)

- Reduces the risks of caravan or trailer jack-knifing, skidding and trailer sway during emergency braking situations.
- Improved braking performance through increased brake outputs.
- Increases control during evasive procedures on the road.

Other Features & Benefits of ABS

- Lane Change (Swerve Control)
- Trailer Sway Mitigation
- Bluetooth Odometer & Brake Fault Diagnostics (Specific to Bosch TSC, may not be available on other systems)

Ventilated Hydraulic Disc Brakes

A premium high performance brake option offering more consistent braking performance.

Features of Cruisemaster supplied Disc Brakes

- Comes with Deemaxx Caliper & 2 piece ventilated rotor
- Maxx coated calipers are fitted with semi-metallic pads
- 12" ventilated rotor reduces brake fade by providing superior cooling
- Up to 35%* more brake torque than equivalent Electric Drum Brakes
- Not subject to the same level of speed & temperature performance degradation as Electric Drum Brakes
